

MISSISSIPPI STATE DEPARTMENT OF HEALTH
BUREAU OF PUBLIC WATER SUPPLY
CCR CERTIFICATION
CALENDAR YEAR 2014

2015 JUN -4 AM 10:03

Barrentown Utility Association, Inc.
Public Water Supply Name

0180001
List PWS ID #s for all Community Water Systems included in this CCR

The Federal Safe Drinking Water Act (SDWA) requires each Community public water system to develop and distribute a Consumer Confidence Report (CCR) to its customers each year. Depending on the population served by the public water system, this CCR must be mailed or delivered to the customers, published in a newspaper of local circulation, or provided to the customers upon request. Make sure you follow the proper procedures when distributing the CCR. **You must mail, fax or email a copy of the CCR and Certification to MSDH. Please check all boxes that apply.**

Customers were informed of availability of CCR by: *(Attach copy of publication, water bill or other)*

- ☒ Advertisement in local paper (attach copy of advertisement)
☒ On water bills (attach copy of bill) *(2) months / Note: Web address*
☐ Email message (MUST Email the message to the address below)
☒ Other *posted Notice @ Drive-Thru Window - Entry @ Water Ofc. Copies @ 4-30-15*

Date(s) customers were informed: 04/30/15, 05/30/15, / /

CCR was distributed by U.S. Postal Service or other direct delivery. Must specify other direct delivery methods used _____

Date Mailed/Distributed: / /

CCR was distributed by Email (MUST Email MSDH a copy)

Date Emailed: / /

- ☐ As a URL (Provide URL _____)
☐ As an attachment
☐ As text within the body of the email message

CCR was published in local newspaper. *(Attach copy of published CCR or proof of publication)*

Name of Newspaper: Hattiesburg Publishing, Inc / The Petal News, The Lamar Times, The Hattiesburg Post

Date Published: 04/30/2015

CCR was posted in public places. *(Attach list of locations)*

Date Posted: / /

CCR was posted on a publicly accessible internet site at the following address **(DIRECT URL REQUIRED)**:

CERTIFICATION

I hereby certify that the 2014 Consumer Confidence Report (CCR) has been distributed to the customers of this public water system in the form and manner identified above and that I used distribution methods allowed by the SDWA. I further certify that the information included in this CCR is true and correct and is consistent with the water quality monitoring data provided to the public water system officials by the Mississippi State Department of Health, Bureau of Public Water Supply.

Arthur C. Moore

2014 Annual Drinking Water Quality Report
Barrontown Utility Association, Inc.
PWS#0180001
April 2015

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from wells drawing from the Lower and Middle Catahoula Formation and the Miocene Series Aquifers.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identified potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The wells for the Barrontown Utility Association have received lower susceptibility rankings to contamination.

If you have any questions about this report or concerning your water utility, please contact Elaine Tolbert, General Manager, at 601-544-3502. We want our valued customers to be informed about their water utility. If you want to learn more, please attend the annual meeting held the second Monday of November at 7:00 PM at the Barrontown Community Center, 610 Herring Road, Petal, MS.

We routinely monitor for constituents in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that we detected during the period of January 1 to December 31, 2014. In cases where monitoring wasn't required in 2014, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-product of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water poses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level- the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG) - The "Goal" (MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) - The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) - The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/L) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

Parts per billion (ppb) or Micrograms per liter - one part per billion corresponds to one minute in 2,000 years, or a single penny in \$10,000,000.

TEST RESULTS

Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/LCL	Unit Measure	MCLG	MCL	Likely Source of Contamination
Radioactive Contaminants								
5. Gross Alpha	N	2012	3.2	9 - 3.2	pCi/L	0	15	Erosion of natural deposits
Inorganic Contaminants								
10. Barium	N	2014*	.0351	.0033 - .0351	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits
14. Copper	N	2012/14	.4	0	ppm	1.3	AL=1.3	Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives
15. Chromium	N	2014*	5.1	3.1-5.1	ppb	100	100	Discharge from steel and pulp mills; erosion of natural deposits
16. Fluoride	N	2014*	.244	.15 - .244	ppm	4	4	Erosion of natural deposits; water additive which precludes strong leach; discharge from fertilizer and aluminum facilities
17. Lead	N	2012/14	5	0	ppb	0	AL=15	Corrosion of household plumbing systems; erosion of natural deposits
Disinfection By-Products								
81. HAAS	N	2014*	5	No Range	ppb	0	60	By-Product of drinking water disinfection
82. TTHM [Total trihalomethanes]	N	2014*	5.96	No Range	ppb	0	89	By-product of drinking water chlorination.
Chlorine	N	2014	1.5	1.04-2.3	ppm	0	MRDL 4	Water additive used to control microbes

*Most recent sample. No sample required for 2014.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected however the EPA has determined that your water is SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. We did complete the monitoring requirements for bacteriological sampling that showed no coliform presence. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1-800-426-4791.

The Barrontown Utility Association works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.

Please note: This report will not be mailed out to customers individually, however a copy may be requested from our office located at 101 Dogwood Lane, Petal, MS or visit our website at barrontownwater.org.

April 9, 2015, in Book 1508 at Page 771, in the Office of the aforesaid Chancery Clerk; and

WHEREAS, default having been made in the terms and conditions of said deed of trust, and the entire debt secured thereby having been declared to be due and payable in accordance with the terms of said deed of trust, and the legal holder of said indebtedness, Vanderbilt Mortgage and Finance, Inc., having requested the undersigned Substitute Trustee to execute the trust and sell said land and property in accordance with the terms of said deed of trust for the purpose of raising the sums due thereunder, together with attorney's fees, substitute trustee's fees and expenses of sale;

NOW, THEREFORE, I, Lori M. Creel, Substitute Trustee in said deed of trust will, on the 21st day of May, 2015, offer for sale at public outcry for cash to the highest bidder, and sell within legal hours (being between the hours of 11:00 a.m. and 4:00 p.m.) at the main entrance of the new Chancery Court Building at 403 Main Street, Purvis, Lamar County, Mississippi, the following described property situated in the County of Lamar, State of Mississippi, to-wit:

A part of the SE 1/4 of the NW 1/4 of Section 22, Township 2 North, Range 16 West, Lamar County, Mississippi, and being more particularly described as follows: Commence at a point where the centerline of a public road intersects the North boundary line of the SE 1/4 of the NW 1/4 of Section 22, Township 2 North, Range 16 West, Lamar County, Mississippi and run West along the North forty line a distance of 400 feet to the Point of Beginning; thence continue West 240 feet to run South 360 feet; thence run East 240 feet; thence run North 360 feet, more or less, back to the Point of Beginning.

AND ALSO: A non-exclusive easement for ingress and egress across the existing circular drive of the property owned by Ola Irene Saul to the public road.

ALSO: One (1) 2010 Clayton manufactured home, Serial No. CS2011699TNA8.

Said property shall be sold as is, where is. I will convey only such title as is vested in me as Substitute Trustee. The full purchase price must be paid in cash or by certified funds at the time of sale.

WITNESS my signature this 17th day of April, 2015.

/s/ Lori M. Creel
 Substitute Trustee

SUBSTITUTED TRUSTEE'S NOTICE OF SALE

WHEREAS, on December 3, 2009, Kimberly Alawine Cain, an unmarried woman executed a certain deed of trust to Denise McLaurin, Trustee for the benefit of Mortgage Electronic Registration Systems, Inc. as nominee for Regions Bank DBA Regions Mortgage, its successors and assigns which deed of trust is of record in the office of the Chancery Clerk of Lamar County, State of Mississippi in Book 1203 at Page 162 and recorded in Book 1204 at Page 759; and

WHEREAS, said Deed of Trust was subsequently assigned to Regions Bank dba Regions Mortgage by instrument dated December 11, 2014 and recorded in Book 1492 at Page 634 of the aforesaid Chancery Clerk's office; and

WHEREAS, Regions Bank DBA Regions Mortgage has heretofore substituted Shapiro & Massey, LLC as Trustee by instrument dated March 30, 2015 and recorded in the aforesaid Chancery Clerk's Office in Book 1507 at Page 677; and

WHEREAS, default having been made in the terms and conditions of said deed of trust and the entire debt secured thereby having been declared to be due and payable in accordance with the terms of said deed of trust, Regions Bank DBA Regions Mortgage, the legal holder of said indebtedness, having requested the undersigned Substitute Trustee to execute the trust and sell said land and property in accordance with the terms of said deed of trust and for the purpose of raising the sums due thereunder, together with attorney's fees, trustee's fees and expenses of sale.

NOW, THEREFORE, I, Shapiro & Massey, LLC, Substituted Trustee in said deed of trust, will on May 21, 2015 offer for sale at public outcry and sell within legal hours (being between the hours of 11:00 a.m. and 4:00 p.m.) at the East Front Door of the Chancery Court Building of Lamar County, located at Purvis, Mississippi, to the highest and best bidder for cash the following described property situated in Lamar

County, State of Mississippi, to-wit: Lot 5, South Flatts Subdivision, as per the map or plat thereof on file in the office of the Chancery Clerk of Lamar County, Mississippi, together with all improvements and appurtenances thereunto belonging.

And Also:

1/23 of the Retention basin, as shown on the subdivision of South Flatts Subdivision, as filed in the office of the Chancery Clerk of Lamar County, Mississippi.

And Also:

An easement in the shape of a square twenty five feet by twenty five feet in the Northwest corner of Lot 3, for the purpose of a water well. And an easement in the shape of a square twenty five feet by twenty five feet in the Northwest corner of Lot 19, for the purpose of a water well.

I WILL CONVEY only such title as vested in me as Substituted Trustee.

WITNESS MY SIGNATURE on this 16th day of April, 2015.
